### **GSBE Launches Online Safety Training**

Golden State Builders Exchange is proud to announce the launch of its new online safety training program – GSBE Online University.

In partnership with ClickSafety, Golden State Builders Exchanges will be able to provide an online, web-based safety training and record keeping management tool for the construction industry. This is a safety solution designed to augment and enhance contractors' current safety awareness.

In addition to providing a comprehensive training and tracking solution, GSBE Online University provides added value in helping set the framework for fewer jobsite injuries, reducing workers' comp insurance claims and rates, lowering incident rates and helping meet regulatory compliance.

Safety training topics available range from tailgate trainings through OSHA 10- and 30-hour certification courses.

As one construction safety professional said, "Online safety training is ideal for its flexibility. Our staff can log on and take training courses they need for the job at their convenience and in the comfort of their own office."

Click Safety is an award-winning online safety management application that provides web-based learning and documentation solutions. Over the past six years, ClickSafety's e-Learning solutions have been deployed to over 2,000 organizations worldwide.

Golden State Builders Exchanges is a network of 29 Builders Exchanges throughout California representing over 24,000 companies in the construction industry and their more than 223,000 employees.

For more information about the GSBE Online University contact GSBE at (888) 472-3492 or ClickSafety at (800) 971-1080.
